PROFESSIONAL SUMMARY

DevOps Engineer with 5+ years of experience designing, automating, and operating scalable cloud-native SaaS platforms. Skilled in Kubernetes, Terraform, Helm, CI/CD, GitOps, and AWS infrastructure automation. Experienced in implementing observability, reliability engineering, and cost optimization practices to maintain 99.9% uptime for production environments.

CORE SKILLS

Cloud: AWS, Azure DevOps, GCP

Containers & Orchestration: Docker, Kubernetes, Helm, EKS, GKE

Infrastructure as Code: Terraform, IaC, GitOps, ArgoCD

CI/CD: Azure DevOps, AWS DevOps, GitHub Actions

Scripting: Bash/Shell Scripting

Monitoring & Logging: Prometheus, Grafana, ScienceLogic, Seq

Version Control: Git, GitHub, Bitbucket, Azure Repos

Operating Systems: Linux/Unix, macOS, Windows

Practices: DevSecOps, Cost Optimization, Observability, Reliability Engineering

EXPERIENCE

Site Reliability Engineer II

Better World Technology Pvt. Ltd. (Zeta)

July 2025 – Nov 2025 | Hyderabad, India

- Orchestrated cloud operations for high-scale fintech platforms across multi-environment SaaS architectures, maintaining 99.9% uptime through expert management of AWS infrastructure and Kubernetes-based deployments.
- Provided L2/L3 on-call support, conducting Root Cause Analysis (RCA) and writing postmortems to drive preventive architecture updates.
- Collaborated with engineering teams to maintain resilient and compliant cloud operations across AWS infrastructure.

DevOps Engineer

Qapita Fintech Pte. Ltd. (Qapita)

April 2024 – July 2025 | Hyderabad, India

- Achieved an 80% reduction in deployment timelines by migrating infrastructure to Terraform and Helm Charts for EKS-based microservices.
- Built CI/CD pipelines with Azure DevOps and AWS DevOps, streamlining releases.
- Automated API/UI testing with AWS CodeBuild, cutting QA time by 90% (4 hours to 30 minutes).
- Maintained a three-tier AWS architecture (VPC, EKS, RDS) to guarantee scalability and consistent 99% uptime.
- Reduced AWS billing by 25% through optimized service management and the identification and removal of unnecessary expenses.

DevOps Engineer

Sify Technologies Limited (Sify)

Sept 2020 – Feb 2024 | Chennai, India

- Spearheaded the migration of monolithic applications to Dockerized microservices on AWS EKS, improving system scalability by up to 80%.
- Accelerated release cycles by 80% through the implementation of automated CI/CD pipelines and Bash/Shell scripting for Kubeadm cluster setups.
- Deployed ScienceLogic and Zabbix for infrastructure observability, creating custom dashboards and automated alerts to reduce incident response time.

PROJECTS

Cloud-Native IaC & GitOps Platform – [GitHub – IAC](#)

- Automated AWS/GCP infrastructure provisioning using Terraform.
- Built reusable Terraform modules and GitOps workflows for scalable cloud deployments.

DevOps Knowledge Platform API – [GitHub – DevOps Notes API](#)

- Built a DevOps knowledge platform with CI/CD, Cloud Build, Cloud Run, and auto-scaling.
- Documented cloud-native workflows, automation practices, and operational runbooks.

CERTIFICATIONS

- [Certified Kubernetes Application Developer \(CKAD\) – 2024](#)
- [Microsoft Certified DevOps Engineer \(AZ-400\) – 2023](#)
- [Preparing for Google Cloud Certification: Cloud Engineer – 2022](#)
- [ScienceLogic SL1 Professional – 2022](#)
- [AWS Certified Solutions Architect Associate – 2020](#)

EDUCATION

B.Tech in Computer Science and Engineering

NIT Silchar, Assam, India

July 2016 – June 2020

INTERESTS

- Cloud-Native DevOps
- GitOps and AI-Driven Workflows
- Platform Engineering

PROFESSIONAL VALUES

- Continuous learning and strong curiosity for emerging technologies, with a habit of exploring practical use cases and modern engineering patterns.
- Knowledge sharing and mentoring, contributing to team capability growth through collaboration, documentation, and peer support.
